

Autumn Term Homework

Please aim to read with your child daily, as well as logging into Numbots regularly.

The ideas on the grid below are linked to our topic newsletter. Here are **some** activities you could do for the project. We would like the children to follow their interests and be as creative as they like so these are simply ideas and the possibilities are extensive.

English - Traditional Tales	Science - Sensitive Bodies	Geography - Mapping	History - What is history?
Draw your favourite character from a traditional tale, and write something about them. (E.g. The wolf is big and scary.)	Go on a 'senses walk' around your home or garden. Write or draw things you can see, hear, smell, touch and taste.	Draw a simple map of a room in your house, showing where things are.	Look through some old photos with your parent or grandparent - what can you remember? How did you feel?
PE - Orienteering	RE - Creation Stories	PSHE - Me and My Relationships	Art - Drawing
Hide a toy somewhere at home. Make/say a set of simple directions for someone to find it. (e.g. "Go 5 steps to the sofa.")	Draw or colour something you think is very important in our world.	Who is special to you? Create a video explaining why they are special to you.	Can you draw a family portrait?
DT - Sliders and Levers	Completed homework projects can be sent into school, or via the home learning emails. As above, feel free to adapt activities to suit what you have at home or your own ideas.		
Can you find any items in your house which move using a slider or lever?	holly@pendle.lancs.sch.uk horsechestnut@pendle.lancs.sch.uk pine@pendle.lancs.sch.uk
